Applied Engineering Truss Structure

The modular design of these custom towers is perfect for the easy transport and fast assembly required by our rental and staging industry. They are structured to accommodate varied heights and width spans from 20-40'. Built of 20.5" Heavy Duty Schedule 80 1.9" highly polished aluminum tubing, these towers easily raise from a 6' loading position to a height of 35' for optimum visibility. Outriggers with guy wires provide safe stability and with ballast can support these towers in outdoor applications withstanding winds up to 25 miles per hour.

Video West, Inc. provides broadcast and professional quality video, audio, lighting, and staging solutions to the corporate and live events marketplace. We support this with responsive and thorough service.
